

## SUPPORTED DRONES

| Series              | Models                                                                              |
|---------------------|-------------------------------------------------------------------------------------|
| Matrice             | 3DT, RTK variants, 30, 600, 200, 300 (RTK), 350                                     |
| FLIP / AIR / Neo    | FLIP, AIR 3S, Neo, FlyCart                                                          |
| Clone / Inspire     | Clone SPECTRA AIR, Inspire 3, Inspire 2, Inspire 1                                  |
| Mavic 3 Series      | Mavic 3 Pro, Pro Cine, Classic, Mavic 3, Mavic 3R, Enterprise, Enterprise Thermal   |
| Mavic 2 Series      | Enterprise, Enterprise Dual, Enterprise Advanced, Zoom, Pro                         |
| Mavic Air Series    | Air 2S, Air 2, Air 3, Air                                                           |
| Mavic Pro Series    | Mavic Pro Platinum, Mavic Pro, Mavic Pro Controller                                 |
| Mini Series         | Mini 3 Pro, Mini 4 Pro, Mini 2, Mini SE, Mini, Mini 3, Mini 2 SE                    |
| Phantom Series      | 4 Pro V2, 4 Pro, 4 Advanced, 4, 3                                                   |
| Others              | Smart Controller (RM330, RM331, RM500, RM700B, RM510B), Avata & Avata 2, FPV, Agras |
| Controllers & Tools | A3 Flight Controller, Assistant Archives, Android Linked Mobile Device              |

## SUPPORTED DRONES

**AUTEL**

| Series            | Models                                                                            |
|-------------------|-----------------------------------------------------------------------------------|
| EVO II Series     | EVO II, Dual 320, Dual 640T, Dual 640T v2, Dual 640R, Dual 640R v2, Dual 640T RTK |
| EVO II Enterprise | Dual 640T Enterprise, Dual 640R Enterprise, Pro Enterprise                        |
| EVO II Pro Series | Pro, Pro v2, Pro RTK                                                              |
| Other EVO Models  | Evo II v2, V3 Series, Lite/Lite+, Nano Series, Max 4T Enterprise                  |

**Parrot**

| Models                           |
|----------------------------------|
| Anafi, Bluegrass, Bebop 2, Bebop |

**SwellPro**  
*Pioneer of Waterproof drone*

| Models                                                                        |
|-------------------------------------------------------------------------------|
| SplashDrone 4 (CFID Direct Connect), SplashDrone 3+, Fisherman Max FD2 (Logs) |

## SUPPORTED DRONES

| Models                 |
|------------------------|
| Skydio 2, 2+, X2D, X2E |

| Models                 |
|------------------------|
| H520, H520E, Typhoon H |

| Models   |
|----------|
| 3DR Solo |

| Platform                  | Models                                                |
|---------------------------|-------------------------------------------------------|
| Holybro PX4/Ardupilot     | Pixhawk Series, Pixhawk 6X/6C                         |
| CubePilot PX4/Ardupilot   | Cube Series                                           |
| CUAV PX4/Ardupilot        | V5 Series                                             |
| MakeFlyEasy PX4/Ardupilot | PixPilot Series                                       |
| SpeedyBee PX4/Ardupilot   | F4 Series                                             |
| Other                     | Arducopter, JIYI K++ V2 (Manual Process As HOBBY LOG) |

| UAV Type                                    | Key Files Generated by CFID                                 | Notes                                                               |
|---------------------------------------------|-------------------------------------------------------------|---------------------------------------------------------------------|
| DJI                                         | .DAT, .csv, .kml, tombstone.txt, .DATE                      | .csv has flight data incl. GPS, altitude, fix status, RC connection |
| Skydio                                      | .runlog, .csv, .kml, .log, .h265, .LRV, .M4A, tombstone.txt | Includes video & audio logs                                         |
| Parrot                                      | .pud, .csv, .kml, tombstone.txt                             | Standard flight log formats                                         |
| Autel                                       | log001.bin, .csv, .kml, tombstone.txt                       | High-frequency data; duplicates filtered                            |
| Hobby Drones (Pixhawk, PX4, Swellpro, etc.) | .ULog, .BIN, .csv, .kml, tombstone.txt                      | Mavlink-style logs                                                  |

**Common CFID Outputs:**

-  .csv – Flight logs (coordinates, altitude, GPS status)
-  .kml – Mapping-compatible logs
-  tombstone.txt – Device metadata (serials, firmware, flight stats)
